Baltimore City Board of Election Director Armistead Jones's duty was to investigate and correct what went wrong in the 2016 Baltimore City Primary Election that caused the election to be uncertified after it was certified.

Armistead Jones told the [Baltimore City Council](#) that he met with 1000 Election Judges that had problems in the Primary (see linked results: **Survey Details- 2016 Primary.**)

Director Jones acts as though this was a sufficient investigation into what happened.

Reviewing this survey it is **OBVIOUS** that the **Survey Details- 2016 Primary** document **IS NOT** an investigation but simply an after-action questionnaire of some election judges on how satisfied they were with their training.

No rational, thinking person would confuse this questionnaire with any definition of an investigation.

Maryland 20-20 Watch asks the following:

Why was a **PROPER INVESTIGATION** into what went wrong in the Primary Election **NOT CONDUCTED** prior to the General Election?
